United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

Important Notification

EDIUS 9 requires SHA-2 hash algorithm code signing to be active Grass Valley hardware driver. All versions of Windows 7, Windows 8.1 and Windows 10 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires installation of Windows 7 updates in order to use Grass Valley hardware. There are following two ways to support SHA-2 code signing:

Obtain the latest update (recommended)

Obtain the latest update from Windows Update

Install two security updates

Install TWO Security Updates on Windows 7. Download stand-alone installer files from Microsoft website then run the installer. They MUST be installed in the following order.

1. [Security Update for Windows 7 for x64-based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-based Systems \(KB3033929\)](#)

If they have not been installed, installed Grass Valley hardware may not work.

New Features of Version 9.10.3086

This update provides the following additional features:

EDIUS

- Support AVC Proxy clip recorded by XAVC equipment
- Support to display progress of certain process (timeline rendering, file export, batch export) on EDIUS icon
- Support to export H.265 (HEVC) clip on Intel 6th or 7th Generation Core i processor based system using Intel Quick Sync Video

Mync

- Support Author metadata in JPEG clip
- Support to create a sub clip on Storyboard
- Support "Lens Model" information in still clip shot by Canon EOS 5D Mark II
- Preserve original "Date taken" for snapshot
- Support keyboard shortcut to add/remove tag
- Support simultaneous preview for multiple still images

Update History

The following issues are fixed or improved in this version:

EDIUS

- Block noise appears in exported MPEG2 MXF clip
- Block noise appears on MPEG1 clip exported by EDIUS 8 (SFDC00579722)

- Improve MPEG2 encoder performance
- XDCAM HD 422 segment encode does not work when exporting certain timeline (SFDC00578332)
- EDIUS cannot import certain H.265 clip correctly
- EDIUS installation fails if .NET Framework 4.7 requires to restart PC
- Assemble/Insert rec to tape cannot be cancelled
- Timeline sequence order unexpectedly changes (SFDC00597786)
- EDIUS handles still clip incorrectly when importing FCP XML
- EDIUS doesn't save changing of color-space setting
- EDIUS handles DMC information incorrectly when importing FCP XML
- EDIUS fails to load certain MP4 clip (SFDC00610087)
- Effect keyer is not divided in EDIUS timeline (SFDC00610447)
- EDIUS installation fails if newer version of VC Runtime already exists

Mync

- Mync slowly works to re-register clip
- Previous frame momentarily appears when cutting a clip on Storyboard
- Storyboard context menu does not work
- Mync does not update to hi-res thumbnail when changing library folder
- Mync cannot edit Smart Catalog with Date taken
- Searching still image sequence works slowly
- Mync does not exit from full screen preview after selecting another clip

Design Limitations

EDIUS & Mync

Restrictions after Uninstallation of QuickTime for Windows

The following functionality will be lost if QuickTime is uninstalled:

Still Image File Formats: Flash Pix; Mac Pict; QuickTime Image

MOV Video File Formats: M4V or some MOV file formats

MOV Video File Formats: 3GP; 3G2 (export)

Audio File Formats: MOV (other than Linear PCM and AAC); QuickTime Audio

EDIUS

Exporting AAF Files

In the [Project Exporter (AAF)] dialog box, selecting [Type: 1] in [Preset] exports files in AVI (Grass Valley HQ) instead of QuickTime (H.264).
